## Geometry dash top 50 hardest demons list

WARNING: This is somewhat outdated, and a lot of bugs. The source this book includes upcoming demons. It will not include re-versions if there are no GAMEPLAY changes. I only put in level combinations if they are verified as Catabath. The unrated level counted as long as it beaten legit. Contact these people if you have any questions regarding why a particular record was declined. Don't needlessly bug them on the submission check though! EnsanitygarbadoXaniiGoldenBighunder556HarrySSeadawgDementedDemons need to be judged as having on this listList demons receive a hacked update of difficult changes that will be moved to the heritage section of the list. Additionally, if a demon receives an updated attack before being worthy of the list, it will not be added. However, a demon with initial verification that has been hacked will still be on the list. Profiles must be legitimate and uploaded to YouTube, Vimeo, Bilibili or live streamed to be added to the list. Anyone who posts illegal recordings and transfers them as legit will have their records removed from the list. Illegal records include, but are not limited to, speedhacks, noclips, automatics, nerfs, macros, etc. Records on a level that must be in normal mode and on the live version of the degree or on a fixed appropriate error/low detail copy of the said level. Please refer to the error correction and LDM instructions. Record keeper must meet the percentage requirement of a level to be added to the list said level. Verification does not count as a record in the list, but is still a bonus point. Being in a group where people beat levels for the same channel will cause your recording to be temporarily removed from the list. Records using the integrated LDM of a level are always eligible. Records of appropriate LDM copies of qualified levels. Please contact the List Operator if you are unsure of which decorations may or may not be removed. Generally, an LDM copy should not remove orthophenies that interfere with the player's vision, blind forwards, flashes or boss fights, for example. Referring to the first tutorial, if the previously stated decorations are removed in the integrated LDM of a degree though, it is perfectly nice to use it. Records of appropriate fixes of grants for different refresh rates are eligible. Please contact the List Moderators if you are unsure what the error is or is not an error. Note: Please don't post nonsense, it just makes it harder for all of us and will get you banned. Also note that the rejection form sends duplicates. Apply! Developer Demonist Team HexagonGD Member So here's a small list I am Be working on, show the toughest demons before update 2.0. Some interesting things I've learned: Only the top 7 are currently on the list, only two of them are in the top 50, and only one is in the top 10- Only the top 12 are included on the site. Breakthrough was super overrated when it came out 8) This list is a WIP, so please give me feedback! It probably still sucks, as I did it on my own. I will not include Down Bass because it is practically a demon 2.0. Will add Silent Club once it is ranked.1. Cyclic's Sonic Wave (on the current list, legally verified by Sunix)2.
